STN 50-547
Construction Permit Nos.:
CPPR - 170
CPPR - 171

Marble Hill Nuclear Generating Station - Units 1 and 2

Dear Mr. Keppler:

On August 11, 1982, Mr. T. D. Geib of Public Service Company of Indiana, Inc. (PSI) notified your office of a potentially reportable item as required by 10 CFR 50.55(e). Contrary to procedure, the disposition of a contractor nonconformance report (NCR) was approved without design subcontractor review of the affected equipment. The subject NCR had been written to document removal of seismic uplift restraints from the containment polar crane due to an installation interference. Furthermore, the disposition of this NCR did not prescribe corrective action to reattach the restraints after installation was complete.

PSI Quality Assurance personnel have documented this item on a corrective action request and have initiated action to reopen and redispotion the contractor NCR. A review of similar NCR's which may have been dispositioned without appropriate design subcontractor review will also be initiated.

This letter is intended to fulfill the requirements of an interim report as required by 10 CFR 50.55(e). A further report will be filed on or before December 20, 1982. If you have any questions, please feel free to contact me.

Sincerely,

S. W. Shields
