

MAR 9 1983

Docket No.: 50-412

APPLICANT: Duquesne Light Company
FACILITY: Beaver Valley Power Station, Unit 2
SUBJECT: SUMMARY OF MEETING WITH DUQUESNE LIGHT COMPANY TO DISCUSS
DETAILED CONTROL ROOM DESIGN REVIEW OF BOTH UNITS 1 AND 2

A meeting was held with Duquesne Light Company (DLC) on February 9, 1983 at NRC Headquarters in Bethesda, Maryland. A list of attendees is included as Enclosure 1. The purpose of this meeting was to discuss DLC's schedule for the Detailed Control Room Design Review (DCRDR) of both Units 1 and 2.

It is DLC's intention to house both control rooms in the same room. Unit 2's control room (CR) will be laid out similarly to the already existing Unit 1 CR (rather than as a "mirror image" of the other). Though the panels and equipment for both CR's will be positioned in the same order, Unit 2's CR differs slightly from Unit 1's in the hope that the changes (e.g. fewer annunciators) will improve Unit 2's overall control room design. With a dual control room is it the applicant's intention to license their operators on both units.

The applicant informed the staff that they plan to begin their DCRDR on Unit 1 during its next refueling outage in 1984 and not begin Unit 2's review until early 1985. However, this would mean Unit 2's DCRDR would not be completed until after the unit is scheduled to be granted its operating license (OL). The staff informed DLC that the DCRDR must be submitted before an OL is granted. This requirement is clearly stated in Generic Letter 82-33, "Supplement 1 to NUREG-0737 - Requirements for Emergency Response Capability."

Before concluding the meeting a follow-up meeting was scheduled for Wednesday, February 23, 1983.
