MAR 11 1983

Georgia Power Company
ATTN: Mr. R. J. Kelly
Executive Vice President
P. O. Box 4545
Atlanta, GA 30302

Gentlemen:

SUBJECT: REPORT NOS. 50-321/82-38 AND 50-366/82-36

Thank you for your letter of January 26, 1983, informing us of steps you have taken to correct the violation concerning activities under NRC License No. DPR-57 brought to your attention in our letter of December 21, 1982.

In your response you indicated that qualifications of personnel involved in performing the Type C testing were reviewed and found acceptable. In a conference call between Region II and Hatch on February 28, 1983, you further indicated that prior to the performance of each Type C test, the test engineer and test foreman reviewed the up-to-date drawings with the technicians assigned to the test. That review also identified the correct positions for all valves involved in each test.

These valve positions were not formally recorded to allow subsequent evaluation of test results and system restoration. Your contention of the adequacy of Type C testing is further supported by the fact that an integrated leak rate test was successfully performed subsequent to the Type C testing for both Unit 1 and Unit 2.

Our position that the local leak rate test program must be upgraded remains unchanged. Your response indicates that test procedure revision is in progress and in our discussions on February 28th, you also indicated that system restoration will be confirmed by review of the pre-startup valve alignment procedures. We will examine the results of these procedure revisions and reviews during subsequent inspections.

We appreciate your cooperation with us.

Sincerely,

R. C. Lewis, Director
Division of Project and
Resident Programs
