Dockets Nos. 50-313 & 368

Mr. William Cavanaugh, III
Senior Vice President,
Energy Supply
Arkansas Power & Light Company
P. O. Box 551
Little Rock, Arkansas 72203

Dear Mr. Cavanaugh:

Your responses to IE Bulletin 80-11, Masonry Wall Design, for Arkansas Nuclear One, Units 1 and 2 have been reviewed and evaluated by our consultant, the Franklin Research Center. Their Technical Evaluation Report (TER) is enclosed as Enclosure 1. This TER, with the addition of the safety evaluation findings (as Subsection 4.4) provided in Enclosure 2, constitutes our Safety Evaluation Report.

For ANO-1 this issue is resolved. For ANO-2 this issue is resolved with the stipulation that you will complete your commitment of performing a survey of walls which are inaccessible, due to the operating status of the unit, during the upcoming refueling outage. The survey will identify deviations from the design drawings. We request that you notify the NRC when the field survey is completed and advise us of the results of the survey.

The reporting and/or recordkeeping requirements of this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P. L. 96-511.

Sincerely,

*ORIGINAL SIGNED BY
JOHN F. STOLZ*
