(b) USNRC Letter to MYAPCo, dated November 12, 1982

Subject: Degraded Grid Voltage Protection

Dear Sir:

The Safety Evaluation Report in Reference (b) concurred with the Maine Yankee approach for degraded grid voltage protection. The staff requested that Maine Yankee submit plant operating procedures, the design details for diesel generator load shedding, and technical specification changes.

Maine Yankee will submit this information at least three months prior to placing the protection scheme in service, but no later than December 30, 1983. Installation is planned for the 1984 refueling outage, which is currently scheduled to commence April 1, 1983.

We trust that this schedule is acceptable. Should you have any further questions, please contact us.

Very truly yours,

MAINE YANKEE ATOMIC POWER COMPANY

John H. Garrity
