'AUG 13 1982

Mr. C. E. MacDonald, Chief
Transportation Certification Branch
Division of Fuel Cycle and
Material Safety
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. MacDonald:

Enclosed are three NRC certificates which are in use for tritium shipments and will expire October 31, 1982. Please renew these certificates. The safety analysis reports should continue to be referenced in the new certificates. The certificates are Numbers 6677 (Revision 2), 6678 (Revision 2), and 9964 (Revision 1) for Models LP-12, LP-50, and LP-12-1 packagings.

The Savannah River Operations Office should continue to be listed as a user of these certificates. It will also be necessary to obtain extensions of the IAEA certificates expiration dates. I request this from Rick Rawl at Department of Transportation.

Please advise T. L. Dunckel if you need more information.

Sincerely,

T. L. Dunckel

for
Reuben P. Prichard
Acting Director
Safety Engineering
and Analysis Division
