

DOCKET NUMBER
PROPOSED RULE PR 51

(59FR14912)

April 23 1994

DOCKETED
USMRC

7

'94 MAY 13 P4:13

Secretary, U.S. Nuclear Regulatory Commission;

Washington D C 20055

491 Locust Lane
MOAB, UTAH 84532-2713
OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

Attn: Docketing & Service Branch.

There seems to be a lot of discussion ^{on} Atlas Mill tailings dump. I think it should be left there and capped. The water will not go through it, some of the sides might leach. Most of ^{my} life was spent in the under ground mines division. we tried to leach a large mine dump in southeastern Ariz. We ha' to drill it to get water to go through it to leach it. Most of the people opposing, don't no anything about leaching. ^{Those} ~~the~~ that have lived here for sometime are not in favor of moving it. They say cap it, it will create a lot of dust and mess, Also will cost a lot more money than they say. Because it will still have to be cap after moving it

Sincerely,

Harley E. Blanchard
