

5 12 94

Dear Sir, (59FR14912)

DOCKETED
USMBC

94 MAY 16 P3:15

OFFICE OF SECRETARY
DOCKETING SERVICE
BRANCH

(11)

I'm writing to ask that you please not disturb the tailings pond on the north side of Moah. I've even out-spoken new-comers to the community that you hear from do not represent the feelings of the people who live here. We, the general population, prefer to leave it as it is. Whatever damage it can do was done long ago, and with it just sitting where it is does not destroy the quality of life of us who live here.

In my circle of friends there are three men who worked in uranium, and they are ardently opposed to moving these tailings, Curt Freeman, Pete Byrd and Lynn Day. They say that it should be left in place, and that there is uranium all over this area so that you couldn't remove it if you tried.

also, it would be completely cost inefficient.

You might say that this whole thing represents "much-ado-about-nothing"

Thank you for your consideration.

Aletha Butcher
