Kalamazoo, MI 49001

License No. 21-00182-03
Docket No. 030-04781

Dear Mr. Andrus:

This refers to the routine safety inspection conducted by Messrs. D. Sreniawski and M. Weber of this office on April 4-6, 1994, of activities authorized by NRC Byproduct Material License No. 21-00182-03, and to the discussion of our findings with you at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance of your license. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated June 22, 1993, regarding an apparent violation found during our March 22-24, 1993 inspection. We have no further questions regarding this matter.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Original Signed by John D. Jones

John Jones, Acting Chief
Nuclear Materials Inspection
