SUMMARY

Scope:

This routine, unannounced inspection was conducted in the area of Physical Security for Reactors. Specific areas evaluated were: Security Program and Plans; Audits; Protected and Vital Area Access Control; Alarm Stations and Communications; and Testing, Maintenance and Compensatory Measures.

Results:

In the areas inspected, one non-cited violation pertaining to two areas of Protected Area Badge Access Control were found (See Paragraph 2.c). The two areas were identified by the licensee and appropriate corrective actions were implemented. Consequently, this violation meets the criteria specified in Section VII.B of the Enforcement Policy. Especially noteworthy was the performance of duty of the security force and the proactive security managers. Other than the non-cited violation mentioned above, the licensee continues to protect and secure the vital resources onsite.
