Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Zion Station Units 1 and 2
Environmental Qualification
of Electrical Equipment
NRC Docket Nos. 50-295 and 50-304

Reference (a): December 14, 1983, letter from S. A. Varga
to L. O. DelGeorge.

Dear Mr. Denton:

Reference (a) transmitted the NRC's Safety Evaluation Report (SER) for the Environmental Qualification of Electrical Equipment at Zion Station, and requested our plans and schedule for equipment qualification or replacement within 90 days. On January 21, 1983, the Commission published its Final Rule on Environmental Qualification with an effective date of February 22, 1983. Under the new requirements of 10 CFR 50.49(g), licensees are required to identify equipment already qualified and to submit plans and schedules for qualification or replacement of the of the remaining equipment, by May 20, 1983. Commonwealth Edison will provide this information as required by May 20, 1983; therefore, we will not be providing a separate 90-day response to the SER of reference (a).

Please address questions regarding this matter to this office.

Very truly yours,

F. G. Lentine
Nuclear Licensing Administrator
