Gentlemen:

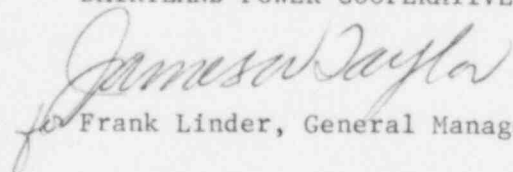

Your letter (Reference 1) requested that DPC remit \$1,200.00 for the application for amendment to the license submitted in Reference 2. DPC maintains that the application falls under the provision of Footnote 2 to Reference 3 since it resulted from a written Nuclear Regulatory Commission request, does not involve a significant hazards consideration, has only minor safety significance, and was requested for the convenience of the NRC. DPC would have preferred not to request the additional Technical Specification.

The Nuclear Regulatory Commission must agree that the application does not involve a safety issue by assigning a Class II fee to the amendment. Therefore, DPC still feels that the proposed change does not require a fee.

If there are any questions concerning this letter, please contact us.

Very truly yours,

DAIRYLAND POWER COOPERATIVE
