Nuclear Material Safety and Safeguards  
U.S. Nuclear Regulatory Commission  
Washington, D. C. 20555

SUBJECT: Waterford SES Unit No. 3  
Special Nuclear Material License No. SNM-1913  
Docket No. 2946

Dear Sir:

Enclosed is a revised page from our application document for the subject license. This submittal, which was discussed between your Mr. Serini and our Mr. Wilkins on February 17, 1983, corrects a logistical problem which makes it difficult for the crane operator to verify storage locations in the spent fuel pool at the completion of each movement. The revision allows any other member of the crew that is performing fuel handling activities to fulfill the independent verification function.

We request that Item 18 of the subject license be revised to reflect this change.

Should you have any questions regarding this submittal, please contact us.

Yours very truly,

*L. V. Maurin*
