Dear Mr. Schumacker:

DOW/WELLMAN FOUNDRY SITE

Attached is a copy of the decommissioning letter on the Dow/Wellman Foundry Site, dated October 8, 1982 to Mr. Martin Schumacker.

I talked with Aerospace (Building 1) and they indicated they had two remaining pieces of thoriated material; one in a jig and one on display. The total weight was about 25 pounds. Assuming 3% thorium, they are well within the 15 pounds generally licensed limit.

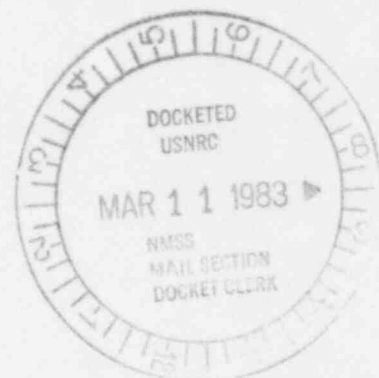

I believe all thoriated material has been reoved from Kerkau (Building 10).

If you have any further questions, please contact me.

Very truly yours,

R. A. Olson
