Subject: McGuire Nuclear Station  
Docket No. 50-369

Reference: RII:AT  
50-369/82-21

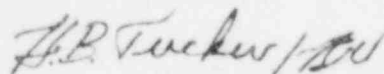

Dear Mr. O'Reilly:

In my September 1, 1982 letter transmitting Duke Power Company's response to the security violation identified in the subject inspection report, it was indicated that a section concerning "Breach of Security Boundaries as a Result of Work Activities" will be included in the next periodic general station security training program audio-visual update. This audio-visual training revision is now scheduled to be completed by March 31, 1983. This information was requested in a telecon between myself and Messrs. H. C. Dance and J. C. Bryant (NRC/Region II) on September 8, 1982.

Additionally, the corrective action (revise security personnel training to assure vital/protected area barrier integrity is maintained, and revise procedures to address specific methods and concerns during inspection of vital/protected areas) which was scheduled for completion by 9/7/82 has been accomplished. Therefore, the only remaining corrective action which has not yet been completed is the above mentioned audio-visual update. However, since that action is effectively being accomplished (as of 9/1/82) by reading the information during the training program (reference the September 1, 1982 response), McGuire Unit 1 is now in full compliance with its approved security plan.

Hopefully this should clear up any remaining concerns on this violation. If I can be of further assistance in this matter, please advise.

Very truly yours,

Hal B. Tucker
