Gentlemen:

Subject: Report No. 50-369/8-33

This refers to the routine safeguards inspection conducted by Mr. B. L. Hall of this office on September 7-10, 1982, of activities authorized by NRC License No. NPF-9 at the McGuire Nuclear Station and to the discussions of our findings held with Mr. M. D. Areas examined during this inspection included your physical security program as implemented under the provisions of Title 10, Code of Federal Regulations, Part 73, "Physical Protection of Plants and Materials" and the specific requirements of your approved Security Plan. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, performance tests, and observations by the inspectors.

We have examined actions you have taken with regard to previously identified enforcement matters. These are discussed in the enclosed inspection report.

One new unresolved item resulted from this inspection and is discussed in the enclosed report. This item will be examined during subsequent inspections.
