DISCUSSION

The Plant Emergency Plan outlines four classes of emergency situations which include incidents ranging from minor personnel injuries to full evacuation of the plant site. The four emergency classes are: Unusual Event, Alert, Site Area Emergency and General Emergency.

Outlined below are basic responses that the security force must implement during an emergency. The dynamics of a situation may dictate addition and/or deletion of some items where a checklist is provided.

Departmental procedures will be prepared to cover security actions during a specific emergency, i.e., fire, medical, etc., and will include the actions below as appropriate.

The Security Shift Supervisor is responsible to activate this procedure upon hearing the emergency declared over the gai-tronics. However, a confirming link is made by the Shift Supervisor to the SAS operator who in turn notifies the CAS operator.

3. The CAS operator shall call in additional personnel per OP-Memo 2E-4, Attachment B if so instructed by the Plant Shift Supervisor.
4. All security personnel will follow directions of the Plant Emergency Director/Technical Support Center Coordinator.
5. Gatehouse security personnel will prepare to admit emergency responders. Direct all contractors and visitors off-site.
6. When directed to report/assemble at the gatehouse, security patrols will respond as directed. CAS personnel and security personnel at the SAS console will remain at their posts pending further instructions. The senior security officer present in each area will account for security personnel present and report the information to the Security Shift Supervisor.

B. Subsequent Action:

1. The SAS operator will record the names of Plant Emergency Responders who complete callbacks and reinitiate Emergency Plan Notification every fifteen minutes until directed to stop.
2. The Security Shift Supervisor will:
 - a. Supervise and direct the Response Force during security incidents.
 - b. Insure that security of the Protected Area is maintained.
 - c. Insure all security actions are properly documented.
 - d. Refer media inquiries to the Manager of Nuclear Information.
 - e. Maintain liaison with law enforcement personnel.
 - f. When directed, evacuate plant and complete actions in OPF-3344.1.
 - g. Insure that responders to plant emergencies are processed properly when entering the Protected Area.
 - h. Comply with instructions of the Plant Emergency Director.
 - i. Implement compensatory measures as required.

C. Follow-Up Actions:

1. The Security Shift Supervisor will:
 - a. Maintain liaison with law enforcement personnel and provide briefings and/or assistance as required.

CHECK-LIST FOR ALERT, SITE-AREA AND GENERAL EMERGENCIES

1. The Security Shift Supervisor will direct the unlocking and opening of Gate #1.

NOTE: Alert Emergencies Step 1 should not be performed unless an evacuation is activated.

2. The Security Shift Supervisor will assign at least two officers to load the following equipment into the Emergency Van and transport it to the Emergency Operations Facility (EOF).

- a. All security badge racks.
- b. All TLD badge racks
- c. All spare dosimeters/TLDs
- d. Nuclear Availability Listing
- e. Visitor Log with spare sheets
- f. Blank Personnel Accountability Sheets, OPF-3344.2
- g. Vital/Access Control Area Listing (VACAL).
- h. I.D. Camera with spare film and blank I.D. forms.
(These items will not be moved during exercises)
- i. All available radios, batteries and chargers.

3. If during the normal day-shift work week or if large numbers of personnel will be evacuating, on arrival at the EOF, the Senior Security Officer present will:

- a. Set up the dosimetry racks in the same order as they are at the gatehouse (Racks are numbered to correspond to numbers on the walls.)
- b. Process only personnel who have EOF training through the accountability first (hold others aside till last).
- c. Direct the personnel to place their dosimetry on the racks in their designated slots and deposit their security badges/ card keys in the container.
- d. Insure personnel frisk.
- e. After passing through accountability direct personnel with EOF training to the task assignment station.
- f. At the task assignment station security supervision shall oversee the smooth assignment of tasks.
