Mr. Lester Rogers, Director
Division of Radiological and
Environmental Protection
U. S. Atomic Energy Commission
Washington, D. C. 20545

Dear Mr. Rogers:

Reference is made to your letter of 2 March 1972 requesting our comments on the AEC Environmental Report on the Virgil C. Summer Nuclear Station, Unit I, South Carolina prepared by the South Carolina Electric and Gas Company.

We have reviewed this environmental report and suggest that the elevation of water temperature in Lake Monticello be listed as an unavoidable adverse environmental effect on page 3 of summary and also Section 2.4, page 2.4-1.

Since three copies of environmental statements suffice for our review, we are returning the two extra copies.

Sincerely,

Robert C. Nelson
