

SEP 14 1982

MEMORANDUM FOR: Harold Denton, Director
Office of Nuclear Reactor Regulation

FROM: William J. Dircks
Executive Director for Operations

SUBJECT: USI A-39, DETERMINATION OF SAFETY RELIEF VALVE (SRV)
POOL DYNAMIC LOADS AND TEMPERATURE LIMITS FOR BWR
CONTAINMENTS

The proposed resolution to USI A-39 as presented in NUREGs 0763, 0783, and 0802 and your memorandum to V. Stello of July 6, 1982, was reviewed by the CRGR on August 11, 1982. The Committee recommended that the proposed technical documents concerning resolution of A-39 be approved for issuance. By this memorandum, I am approving the issuance of NUREGs 0763, 0783 and 0802 as the official technical resolution of the subject safety issue. Implementation of the developed requirements is described in specific implementation sections within each report. With respect to implementation by operating reactor licensees, I expect that you will establish plant-specific schedules according to the guidelines recently approved by the Commission for the new requirements in SECY 82-111B.

(Signed) William J. Dircks

William J. Dircks
