- A. 10 CFR 50.54(p)(2) requires, in part, that the licensee shall submit a report to NRC containing a description of each change made to the security plan within 2 months after the change is made.

Contrary to the above, the inspector determined on May 5, 1994, that changes documented by the licensee in a revised draft of their security plans dated October 1992 were not reported to NRC.

This is considered a Severity Level IV problem (Supplement VII).

- B. 10 CFR 50.54(q) requires, in part, that the licensee shall submit a report to the NRC of each change made to the emergency plan within 30 days after the change is made.

Contrary to the above, the inspector determined on May 5, 1994, that changes documented by the licensee in a revised draft of their emergency plan dated October 1992 were not reported to the NRC.

This is considered a Severity Level IV problem (Supplement VII).

Pursuant to the provisions of 10 CFR 2.201, The University of New Mexico is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C., 20555, with a copy to the Regional Administrator, Region IV, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). If an adequate reply is not received within the time specified in this Notice, the Commission may issue an order or a demand for information as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Consideration may be given to extending the response time for good cause shown.
