JUN - 8 1994

Dear Dr. Nielson:

This letter is to confirm my recent conversations with Mr. William Sinclair, Director, Division of Radiation Control, regarding the Nuclear Regulatory Commission's review of the Utah Radiation Control Program for Agreement Material. This review will include resolution of items identified in previous reviews and correspondence including issues and comments related to Utah's low-level waste regulatory program. The review is scheduled for June 13-17, 1994.

I will be the team leader for the review and will be assisted by other NRC personnel. As your schedule permits, we would like to meet with you or your representative on Friday, June 17, 1994 at 1:00 p.m., to discuss results of the review. In addition, Paul H. Lohaus, Deputy Director for Office of State Programs, will attend the meeting on Friday.

We thank you and your staff for volunteering to participate in the pilot Integrated Materials Performance Evaluation Program in which common performance indicators will be used to evaluate NRC regional offices and Agreement State programs. NRC will be extending an invitation to you or your representative to attend the Management Review Board meeting on the Utah review portion of the pilot program. We also appreciate your staff's effort in coordinating arrangements for the upcoming review.

Sincerely,
