and Construction

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dockets: STN 50-482, STN 50-483

Dear Mr. Denton:

By copy of this letter, we are forwarding to the NRC, Attention Terry Harpster, Chief, Quality Assurance Branch, a copy of Revision 6 to the subject QA program document. This revision provides a routine update of the structures of the SNUPPS project organizations.

The changes described in the enclosure do not reduce the commitments on the part of either SNUPPS utility to the QA Program description for safety-related activities previously accepted by the NRC.

Controlled copies of this revision will be forwarded to regional I/E offices in accordance with standard distribution practices.

Very truly yours,

S. J. Seiken

RPW/dck/8b16
