Dr. Louis Bykoski  
Regional Environmental Economist  
Nuclear Regulatory Commission  
AR-5200  
Washington, D.C. 20555

REF: Millstone Nuclear Power Station, Manchester, Connecticut

Dear Dr. Bykoski:

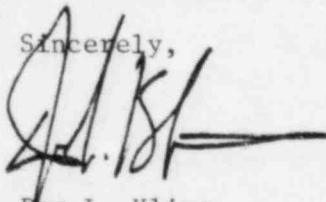

It has come to our attention that the referenced project may have an effect on historic properties potentially eligible for the National Register of Historic Places. We also understand that this project may be licensed by the Nuclear Regulatory Commission.

Your agency's involvement in this undertaking and the nature of the project's effect on historic properties may require obtaining the comments of the Council. The National Historic Preservation Act of 1966, as amended (16 U.S.C. Sec. 470f) and the Council's regulations (36 CFR Part 800) set forth this responsibility. We would appreciate your agency investigating this matter and notifying us of your findings. Should you have any questions, please call Kate M. Perry of our staff at 254-3495, an FTS number.

Historic and cultural properties are among our nation's most significant resources. Your early coordination with the Council and the Connecticut State Historic Preservation Office will ensure that these resources are considered in decisionmaking.

We appreciate your cooperation and look forward to receiving your reply.

Sincerely,

Don L. Klima  
Chief, Eastern Division  
of Project Review
