DECOMMISSIONING PLAN WALTER REED ARMY MEDICAL CENTER

1. Basic Assumptions.

a. References:

- (1) Nuclear Regulatory Commission Guide 3.66, 1 June 1990, "Standard Format and Content of Financial Assurance Mechanisms Required for Decommissioning Under 10 CFR Parts 30, 40, 70, and 72.
- (2) NUPEG/CR-1754, 1 February 1981, "Technology, Safety, and Costs of Decommissioning Reference Non-Fuel Cycle Nuclear Facilities".
- b. Reference 2 provides an example of a reference facility that is a suitable model for WRAMC and WRAIR:
- (1) The facility includes 5 work areas and includes an animal lab, radioisotope room, equipment room, counting room, and office. The area also includes rest rooms and hallways.
- (2) The example determined estimated manpower requirements and costs for decommissioning this reference facility.
 - (3) Costs listed in this example were in 1978 dollars.
- c. We used the referenced facility as a model and followed the approach in Reference 2 with the following adjustments to account for WRAMC and WRAIR's actual situation:
- (1) We expanded the floor space by a factor of 100 to account the actual dimensions of all WRAMC and WRAIR labs and use areas.
- (2) We adjusted the costs using 1994 dollars, to include overhead, and waste costs provided by the AMC radioactive waste disposal office.

2. Cost Estimate.

- a. Planning and preparation of the facility and site for decommissioning. This includes 7,000 person-days in preparing documentation, performing radiological surveys, and work plan development: \$ 1,497,000.
- b. Decontamination and dismantling of radioactive facility components: This includes a total of 15,400 person-days of work

DECOMMISSIONING PLAN WALTER REED ARM! MEDICAL CENTER

in decontaminating fume hoods, lab benches, sink and drain lines, ductwork, other components, ceilings, walls, and floors: \$ 3,992,000.

2. Cost Estimate (Continued):

c. Final survey (3,600 person-days):

\$ 649,600.

d. 25 % Cost contingency (mandatory): \$ 1,534,700.

e. Waste disposal: We assumed all major equipment would be decontaminated rather than shipped as waste and all decontamination liquids would be low enough in activity to allow discharge in the sanitary sewer. Assuming 4,200 drums (55 gallons each) of trash would be shipped at 85 drums per truckload, the transportation costs would be \$ 51,750. Container costs equal \$ 210,000. Burial costs equal \$ 9,860,000 (\$ 313 per cubic foot or \$ 2,350 per drum). The three irradiators we possess would be \$ 100,000 each to ship as waste.

Total waste cost:

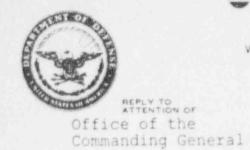

\$ 10,400,000.

f. 25 % Waste Contingency:

\$ 2,600,000.

TOTAL COST FOR DECOMMISSIONING WRAMC AND WRAIR: \$ 20,673,300.

- 3. The method of assuring funds for decommissioning is by providing a Statement of Intent in accordance with 10 CFR 30.35(f)(4).
- 4. Adjusting cost estimates and associated funding levels will be by reanalysis upon occasion of each license renewal.

DEPARTMENT OF THE ARMY WALTER REED ARMY MEDICAL CENTER WASHINGTON, D.C. 20307-5001

April 14, 1994

STATEMENT OF INTENT

- 1. I, Ronald R. Blanck, Commander of Walter Reed Army Medical Center, am the official, duly appointed by the Headquarters, Department of the Army, to represent my organization.
- 2. I submit this Statement of Intent for the following Nuclear Regulatory Commission Licenses:
- a. License Number 08-01738-02, expiration date 30 April 1993 (Renewal application submitted on 21 January 1993).
- b. License Number 08-01738-03, expiration date 30 November 1996.
- 3. The facilities included under this Statement of Intent are:
- a. Walter Reed Army Medical Center, Washington, District of Columbia.
- b. Walter Reed Army Institute of Research, Washington, District of Columbia.
- c. Armed Forces Institute of Pathology, Washington, District of Columbia.
- d. Walter Reed Army Medical Center, Forest Glen Section and Annex, Silver Spring, Maryland.
- e. Walter Reed Army Medical Center, Department of Pathology, U.S. Army Medical Laboratory, Fort Meade, Maryland.
- f. Walter Reed Army Institute of Research, Animal Holding Facility, Fort Meade, Maryland.
- g. Walter Reed Army Medical Center, Andrew Rader Army Health Clinic, Fort Myer, Virginia.
- h. Walter Reed Army Institute of Research, Rickman Building, 13 Taft Court, Rockville, Maryland.
- i. U.S. Army Institute of Dental Research Facility, Fort Meade, Maryland.

- 2 -

4. Based upon our Decommissioning Funding Plan, compiled IAW Nuclear Regulatory Commission guidance, we currently estimate our total decommissioning cost to be \$ 20,673,000.

5. As Commanding General of Walter Reed Army Medical Center and designated licensee of our NRC Licenses, I am providing this written assurance that sufficient funds for decommissioning will be secured when necessary for the eventual decommissioning of our licenses.

Department of the Army Walter Reed Army Medical Center

ATTN: Llewellyn E. Piper

Lieutenant Colonel, U.S. Army

Executive Officer

Washington, DC 20307-5001

Dear Colonel Piper:

Subject: Financial Assurance for Decommissioning

This is in reference to your submittal dated June 21, 1990 to provide financial assurance for License Nos. 08-01738-02 and 08-01738-03. We have reviewed your submittal and request you to modify these documents to address the specific issues listed below:

1. Submit a Decommissioning Funding Plan (DFP) and actual cost estimate.

10 CFR 30.35 requires licensees to submit certification for financial assurance for decommissioning purposes. However, 10 CFR 30.35(c)(2) requires licensees to sumit a decommissioning fund plan (DFP), including an actual estimate of the cost to decommission facilities, in any application for license renewal. Since your application for renewal for License No. 08-01738-02 is under consideration, a DFP is now required. Submit a DFP and include a more detailed cost estimate to decommission your facilities. The cost estimate should include all information necessary to complete Appendix F of Regulatory Guide 3.66 (copy enclosed). The enclosed NUREG/CR-1754, Addendum 1 may be helpful in preparing your cost estimate.

Provide additional detail in the cost estimate and account for the costs of planning, preparation and conducting a final radiation survey.

Your submittal breaks down the total decommissioning cost for the facility into four major areas of activity: (1) Planning and preparation; (2) Decontamination and dismantling; (3) Packaging, shipment and disposal of radioactive waste; and (4) Final radiation survey.

However, you submitted a cost estimate of zero dollars for all activities except packaging, shipment, and disposal of radioactive wastes. You stated that all other activities "will be performed by active duty military personnel and Department of the Army Civilians," who are assigned to the Medical Center.

The fact that your employees will perform decommissioning activities does not guarantee that you will have funds available to pay for these activities. The financial assurance requirements in 10 CFR 30.35 are intended to protect (in part) against the possible financial default of the licensee. Therefore, even if a licensee is expected to conduct decommissioning activities without incurring additional costs, the NRC would have to obtain funds to pay a third party to decommission the facility in the event that the licensee became unable or unwilling to conduct the activities. The current submittal does not assume all decommissioning costs. Regulatory Guide 3.66 "Standard Format and Content of Financial Assurance Mechanisms Required for Decommissioning Under 16 CFR Parts 30, 40, 70 and 72" June 1990, (copy enclosed), recommends that decommissioning cost estimates include the costs of planning and preparation of the facility for decommissioning and the costs of conducting a final radiation survey (see pages 1-9). You submitted cost estimates of zero dollars for all items except item (3). In your response, account for these costs, thereby demonstrating your ability to complete all major decommissioning activities.

3. Incorporate a contingency factor into the total decommissioning cost estimate.

Apparently, you have not made any allowance in the cost estimate for contingencies. Regulatory Guide 3.66 recommends that a contingency factor be included in the decommissioning cost estimate. Incorporating a contingency factor in the cost estimate will help to ensure that licensees are prepared for unexpected circumstances that could raise decommissioning costs. NUREG/CR-1754, (copy enclosed), uses a contingency factor of 25 percent in its cost estimates for each of six reference laboratories. Please incorporate a contingency factor of 25 percent into the decommissioning cost estimate. You may choose to use a lower contingency factor if you can show why a lower factor is appropriate.

Provide evidence that the manufacturer will accept return of irradiators.

You stated that you would return the five irradiators to the manufacturer at a cost of \$10,000 per irradiator for shipping. However, you submitted no evidence that the manufacturer would accept the returned irradiators. Please submit either a letter from the manufacturer stating that it will accept the return of your irradiators should your facility require decommissioning, or an estimate of disposal costs to a licensed waste disposal site.

 Provide a Statement of Intent specifying the amount of the funds to be requested and obtained.

Although you provided us with a Statement of Intent attached to your letter dated June 21, 1990, you have not indicated the amount of funds which will be requested and obtained to carry out the required activities described in your decommissioning funding plan.

The purpose of the Statement of Intent is to ensure that, early in the life of the licensed facility, government licensees make their funding bodies aware of decommissioning requirements, costs and the eventual need for funding.

Please submit a Statement of Intent specifying the license number, and the amount of funds to be requested and obtained in order to carry out the decommissioning activities. Please be sure to submit an originally signed document including a description of the facilities for which the Statement of Intent provides financial assurance and specify the corresponding decommissioning costs.

Satisfactory financial assurance is required for your license. Therefore, we request that you respond within 30 calendar days of the date of this letter. Please reply in <u>duplicate</u> to my attention at the Region I office and refer to Mail Control No. 112749/112748.

If you have any questions regarding this letter, please contact Anthony Dimitriadis of my staff at (215) 337-6953.

Sincerely,
Original Signed By:
Mohamed M. Shanbaky

LIST OF INSTRUCTIONS

DEPARTMENT OF THE ARMY - WALTER REED

In reviewing the comments the reviewer will note that there will be some overlap between ICF and OGC comments. The following comments should be included in the basis for the deficiency letter:

- 1. ICF comment 1 plus last paragraph.
- 2. All OGC comments.

All other comments and discussions are for reviewer information.

February 6, 1991

Note to: Louis Bykoski, NMSS/LLWM

From: Mike Finkelstein, OGC/R&FC

Re: Review of ICF Comments in 5th Package dated 1/7/91

For each of the submittals listed below, the regional reviewers must verify that the document is a signed copy of the original and duly notarized.

Unless otherwise stated, the ICF comments and recommendations are correct and should be implemented.

Department of the Army, Walter Reed Army Medical Center (DFP, Statement of Intent)

The licensee should adopt Appendix F to the Reg. Guide to demonstrate that it has provided reasonable cost estimates for all major decompositions activities. ICF's assumption on restoration, stabilization & surveillance is again premature. The regional reviewer should verify the validity of this assumption.

Proof that the irradiator manufacturer guarantees to accept the return of the licensee's irradiators should be submitted with the package. The Statement of Intent itself is acceptable.

703/934-3000

ICF INCORPORATED

December 21, 1990

To:

Dr. Lou Bykoski, NMSS/NRC

From:

Greg Currey, John Collier, and Michael Berg, ICF Incorporated

Subject

Review of Statement of Intent Submitted by the Department of the

Army, Walter Reed Army Medical Center

The U.S. Department of the Army in Washington, D.C. submitted a statement of intent for \$50,000 to cover decommissioning costs for licenses 08-01738-02 and 08-01738-03, issued under 10 CFR Part 30. These licenses apparently cover Army medical facilities across Maryland, Virginia, and the District of Columbia. The Commander of Walter Reed Army Medical Center signed the statement, which stated that he was appointed by the Headquarters, Department of the Army to represent his organization. Upon reviewing this submission, ICF recommends that NRC Region I either:

 Accept the Submission if the Cost Estimate is Acceptable, or Require Additional Detail in the Cost Estimate

The licensee states that its decommissioning plan includes (1) planning and preparation of the facility for decommissioning; (2) decontamination and dismantling of radioactive facility components; (3) packaging, shipment, and disposal of radioactive wastes; and (4) a final radiation survey. However, the licensee submitted a cost estimate of zero dollars for all activities except packaging, shipment, and disposal of radioactive wastes. The licensee stated that all other activities "will be performed by active duty military personnel and Department of the Army Civilians," who are assigned to the medical center.

The fact that the licensee's employees will perform decommissioning activities does not guarantee that the licensee will have funds available to pay for these activities. The financial assurance requirements of 10 CFR 30.35 are intended to protect (in part) against the possible financial default of the licensee. Therefore, even if a licensee is expected to conduct decommissioning activities without incurring additional costs, NRC would have to obtain funds to pay a third party to decommission the facility in the event

¹ ICF assumes that the licensee does not need to restore contaminated areas on facility grounds, stabilize the site, or perform long-term surveillance to properly decommission its facility because the licensee did not identify the need to conduct such activities in its decommissioning funding plan.

that the licensee became unable or unwilling to conduct the activities.

Although default seems unlikely in the case of this licensee, the current submission does not assure all decommissioning costs.

ICF recommends that NRC either accept the submission (because the probability that the licensee will default on its unquantified decommissioning obligations is very small), or require the licensee to use or adapt the "Cost Estimating Tables" in Appendix F of the draft Regulatory Guide "Standard Format and Content of Financial Assurance Mechanisms Required for Decommissioning Under 10 CFR Parts 30, 40, 70, and 72," January 1990, to demonstrate that it has provided reasonable cost estimates for all major decommissioning activities. In the latter case, the licensee should incorporate a contingency factor of 25 percent into its estimate², and should clarify that it has not included in its cost estimate credit for any salvage value that may be realized with the sale of potential assets after decommissioning (see page 1-13 of the draft Regulatory Guide).

Other Issues

The licensee stated that it would return its five irradiators to the manufacturer at a cost of \$10,000 per irradiator for shipping. However, it submitted no evidence that the manufacturer would accept the returned irradiators. NRC may wish to request that the licensee submit a letter from the manufacturer guaranteeing that it will accept the return of the licensee's irradiators should the licensee's facility require decommissioning.

Finally, NRC should ensure that the statement of intent submitted by the licensee is an originally signed duplicate, as recommended in NRC's draft Regulatory Guide. Because ICF does not possess the original submissions, we cannot verify compliance with this requirement.

attachments

Use of a contingency factor of 25 percent is consistent with the cost estimates for each of six reference laboratories included in NUREG/CR-1754, Addendum 1, Technology, Safety and Costs of Decommissioning Reference Non-Fuel-Cycle Nuclear Facilities: Compendium of Current Information, Pacific Northwest Laboratory, October 1989.

General comments on DFP:

CEECKLIST FOR REVIEWING DECOMMISSIONING FUNDING PLANS (DFP's)

QUESTIONS

COMMENTS

(1)	Does the licensee provide supporting documentation for its cost estimates? Yes No	
(2)	Does the licenses use the Appendix F "Cost Estimating Tables?" Yes No	
(3)	Does the cost estimate include the following major cost elements?	
(i)	Planning and Preparation? Yes No	Included, but cost estimate.
(11)	Decontamination and/or Dismantling of Radioactive Facility Components? YesNo	Included, but cost estimate is zero.
(111)	Packaging, Shipping, and Disposal of Radioactive Wastes? Yes No	
(iv)	Restoration of Contaminated Areas on Facility Grounds?	Assumed not applicable because licensee does not mention admity or related costs.
(v)	Final Radiation Survey? Yes No	Included, but cost estimate is zero.
(vi)	Site Stabilization, Long-Term Surveillance?	Assumed not applicable because licensee does not mention activity or related costs.

CHECKLIST FOR REVIEWING DFP's (continued)

QUESTIONS

COMMENTS

(4)	Is the total cost estimate reasonable for the type(s) and size(s) of facility licensed? Yes No No No Not Sure	Information is needed on size of facility and number of components to be decommissional LICENSEE SHOULD SUBMIT LETTER FROM MAN. FACT REPORTED AND A TEAT TO
(5)	Are the cost estimates for individual facility activities and/or components reasonable? Yes No Not Sure	Labor costs for all activities should be included in estimate. Shipping costs for 5 ivadiators are only costs included in estimate. Estimate should include costs of equipment and supplies needed for decommissioning, amounts of waste generated by decontaining activities, transportation and disposal costs for these wastes.

CHECKLIST FOR REVIEWING DFP's (continued)

QUESTIONS

COMMENTS

(6)	Do the computations seem correct? Yes No	
(7)	Does the licensee take credit for the potential salvage value of recovered materials or decontaminated equipment? Yes No	Licensee does not mention Salvage value.
(8)	Does the licensee include a contingency factor in the cost estimate? Yes No	Licensee does not mention contingency factor.
(9)	Does the licensee provide a description of the methods that will be used to adjust the decommissioning cost estimate periodically over the life of the facility? Yes No	method of adjusting cost estimates will be by we analysis upon the occasion of each license renewal.

JUN 29 1990

DECOMMISSIONING PLAN for Walter Reed Army Medical Center 1. Cost Estimate. \$00.00 a. Planning and preparation of the facility and site for decommissioning. All planning and preparation will be performed by active duty military personnel and Department of the Army Civilians, who are assigned to Walter Reed Army Medical Center. All activities will be performed as a part of routine operations; no specific additional funds will be required. Decontamination and dismantling of \$00.00 radioactive facility components. All decontamination and dismantling will be performed by active duty military personnel and Department of the Army Civilians, who are assigned to Walter Reed Army Medical Center. All activities will be performed as a part of routine operations; no specific additional funds will be required. Packaging, shipment, and disposal of \$50,000.00 radioactive wastes. The US Army Material Command contracts with Chem-Nuclear for the disposal of all radioactive wastes for all US Army users of byproduct materials; no cost is born by any individual user. WRAMC's five irradiators could be processed by Chem-Nuclear, but it would be more cost-efficient for the Army, at large, for them to be returned to their manufacturers for recycling. In this case, WRAMC would have to fund \$10,000.00 shipping costs per irradiator. (WRAMC recently purchased an irradiator; \$10,000.00 shipping costs were included.) \$00.00 d. A final radiation survey. All final surveys would be performed by active duty military personnel and Department of the Army Civilians, assigned to Walter Reed Army Medical Center. All activities would be performed as a part of routine operations; no specific additional funds would be required. \$50,000.00 TOTAL

DECOMMISSIONING PLAN for Walter Reed Army Medical Center (continued) 2. The method of assuring funds for decommissioning would be by Statement of Intent as is allowed by 10CFR30.35(f)(4). 3. The method of adjusting cost estimates and associated funding levels will be by reanalysis upon the occasion of each licenses renewal.

DEPARTMENT OF THE ARMY WALTER REED ARMY MEDICAL CENTER WASHINGTON, D.C. 20307-5001

Office of The Commanding Gararal

STATEMENT OF INTENT

- 1. I, Richard D. Cameron, Commander of Walter Reed Army Medical Center, am the Official duly appointed by the Headquarters, Department of the Army to represent my organization.
- 2. The Nuclear Regulatory Commission Licenses for which this Statement of Intent is being issued are:
 - (a) License Number 08-01738-02 (expiration date 30 Apr 93)
 - (b) License Number 08-01738-03 (expiration date 31 May 91)
- 3. The facilities for which this Statement of Intent is being issued are:
- (a) Walter Reed Army Medical Center, Washington, District of Columbia;
- (b) Walter Reed Army Medical Center Forest Glen Section and Annex, Silver Spring, Maryland;
- (c) Walter Reed Army Medical Center, Department of Pathology, Fort Meade, Maryland (U.S. Army Medical Laboratory)
- (d) Walter Reed Army Medical Center, Andrew Rader Army Health Clinic, Fort Myer, Virginia;
- (e) Walker Reed Army Institute of Research, Animal Holding Facility, Fort Meade, Maryland;
- (f) Walter Reed Army Institute of Research, Rickman Fullding, 13 Taft Court, Rockville, Maryland;
- (g) Walter Reed Army Institute of Research, F y West Research Center, 9620 Medical Center Drive, Rockville, Maryland;
- (h) U.S. Army Medical Research Institute for Infectious Diseases, Fort Datrick, Frederick, Maryland; and
- (i) U.S. Army Institute of Dental Research Facility, Fort Meade, Maryland.

4. In accordance with the requirements of 10 CFR 30.35, and in my capacity as the Commander of Walter Reed Army Medical Center, I am providing assurance that sufficient funds for decommissioning will be obtained when necessary for the eventual decommissioning of WRAMC's NRC Licenses.
