Gentlemen:

This refers to the inspection conducted by Mr. J. T. Conway of this office on January 10-14, 1983, of your facility at Covington, Ohio, associated with the supply of nuclear welding filler metal and to the discussions of our findings with Mr. C. R. Miller and members of your staff at the conclusion of the inspection.

This inspection was made as a result of the notification by the Tennessee Valley Authority of the furnishing of mixed diameter electrodes (1/8" and 5/32" in canisters) to the Hartsville nuclear site.

Areas examined and our findings are discussed in the enclosed report. Within these areas, the inspection consisted of an examination of procedures and representative records, interviews with personnel, and observations by the inspector.

During the inspection it was found that the implementation of your QA program failed to meet certain NRC requirements. The specific findings and references to the pertinent requirements are identified in the enclosures to this letter.

This Notice of Violation is sent to you pursuant to the provisions of Section 206 of the Energy Reorganization Act of 1974. You are required to submit to this office within 30 days from the date of this letter, a written statement containing: (1) a description of steps that have been or will be taken to correct these items; (2) a description of steps that have been or will be taken to prevent recurrence; and (3) the dates your corrective actions and preventive measures were or will be completed.
