Mr. W. C. Seidle, Chief
Reactor Project Branch 2
U. S. Nuclear Regulatory Commission
Region IV
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76011

Reference: Docket No. 50-285

Dear Mr. Seidle:

Installation of HPN and ENS Telephones
for the Fort Calhoun Station
Permanent Emergency Operations Facility (EOF)

The Omaha Public Power District is presently in the process of completing the necessary work to the permanent EOF prior to declaring it functionally operational by January 1, 1983.

It is the District's understanding that the Commission is responsible for ensuring that the HPN/ENS telephones are installed in the EOF, located at the District's North Omaha Power Station. Therefore, to ensure these telephones are installed and operational by the January 1, 1983 implementation schedule, the District requests the Commission commence the necessary actions to install these telephones. In conducting your planning for this effort, please ensure that the existing HPN/ENS telephones at the interim EOF at the Fort Calhoun Station are maintained operable until the subject telephones are fully operational at the permanent EOF. This will ensure the District maintains the necessary emergency preparedness capabilities during the transition to the new EOF. The District's interface for this effort is Mr. Sig Hahn, who can be reached at (402) 536-4412. Mr. Hahn can provide you with the exact room locations for installing the subject telephones.

Sincerely,

W. C. Jones
Division Manager
