L-82-441

Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit 1
Docket No. 50-335
Fire Protection Rule
Submittal (Corrections)

Reference: a) FPL letter No. L-82-243 dated June 10, 1982

Reference a) transmitted the St. Lucie fire protection report entitled "Appendix R Fire Protection Review" in response to the remaining open items of Appendix R to 10 CFR 50.

As you are aware, this report was prepared on an expedited basis in order to fulfill our commitment to an early submittal date, i.e., June 10, 1982. As a result of the voluminous content of the report and the abbreviated project schedule, a number of typographical and editorial errors (as well as a few content errors) were missed during our final review. Enclosed please find seven (7) copies of Revision 1 to the fire protection report issued to correct these errors. Please note that it is not the intent of this Revision to alter the fire protection approach, analysis technique, or proposed plant modifications for any fire areas, but to correct those errors which reduce the clarity of the submittal or produce any inconsistencies, and thus facilitate your review.

Florida Power & Light regrets any inconveniences this revision may cause.

Very truly yours,

J. A. De Mastry
Robert E. Uhrig
Vice President
Advanced Systems & Technology
