Gentlemen:

Thank you for your letter dated February 23, 1983, providing us your revised response to one of the items of noncompliance which we brought to your attention in Inspection Report No. 50-454/82-05; 50-455/82-04 forwarded by our letter dated June 24, 1982. We will examine these matters during a subsequent inspection.

Regarding visual weld examination being classified as a subjective inspection attribute, we understand this classification will be used only for surface conditions which do not affect the integrity of the weld.

The names of the additional inspectors whose work is to be checked have been provided to site personnel by the NRC Resident Inspectors office.

Your cooperation with us is appreciated.

Sincerely,

R. L. Spessard 15/
