License No. 34-16763-01

Gentlemen:

This refers to the routine safety inspection conducted by Mr. W. J. Slawinski of this office on September 27, 1982, of activities authorized by NRC Byproduct Material License No. 34-16763-01 and to the discussion of our findings with you and Ms. Linda Smith at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated August 17, 1978, regarding apparent items of noncompliance found during our July 12, 1978, inspection. We have no further questions regarding these matters.

During this inspection, certain of your activities appeared to be in non-compliance with NRC requirements, as specified in the enclosed Appendix. A written response is required.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

D. J. Sreniawski, Chief
Materials Radiation Protection
