

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

DOCKET # 50-382
APR -5 10:06

Before the Atomic Safety and Licensing Board

In the Matter of)
LOUISIANA POWER & LIGHT CO.) Docket No. 50-382
(Waterford Steam Electric Station) March 29, 1983
Unit 3)

REQUEST FOR AN EXTENSION OF FILING DATE

On the last day of the hearing concerning the limited issue of the evacuation brochure a schedule for filing Findings of Fact and Conclusions of Law was set by this Board. The schedule was this:

Applicant March 14, 1983
Joint Intervenors March 23, 1983
Staff April 4, 1983
Applicant reply April 14, 1983

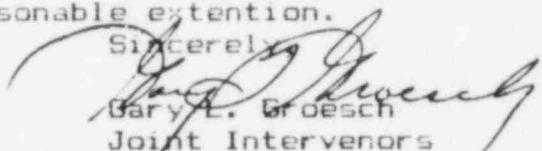

After receiving the extensive document filed by the Applicant on March 14, 1983, it became clear that more time would be necessary to adequately file Findings of Fact and Conclusions of Law. Further, Joint Intervenors are involved in litigation and rate filings on the state and local level. Thus, we are requesting a new schedule extending the Joint Intervenors time for filing Findings of Fact and Conclusions of Law by one week.

In a conference call of March 22, 1983 including Judge Wolfe, Mr. Turk, Mr. Churchill, and myself, a new schedule was tentatively established:

Joint Intervenors March 30, 1983
Staff April 11, 1983
Applicant reply April 21, 1983

Both the Applicant and Staff requested additional time because of Joint Intervenors request. In addition, the Applicant mentioned that more time would possibly be requested because of conflicts with an appeal hearing scheduled for April 19. Joint Intervenors would not oppose a reasonable extension.

Sincerely,

Gary L. Groesch
Joint Intervenors
