Attn: Document Control Desk

Re: Reply to a Notice of Violation

Gentlemen;

As per your request in your correspondence dated 5/12/94, the following is AT Laboratories, Inc. written statement regarding the violations received from the NRC:

ATL did transport radioactive material outside the confines of its plant and the package was not accompanied by a shipping paper.

However, ATL has changed our procedures to insure that this violation does not occur in the future. Shipping papers have been enclosed within all moisture density gauges. In addition, all ATL personnel who may be required to transport or operate a nuclear gauge have also been issued a set of shipping papers. Therefore, if the papers are not with the gauge when it is received, the individual should have a set of transport documents with his paperwork. Compliance has been achieved at this time.
