Subject: Cooper Nuclear Station  
Quality Assurance Program  
NRC Docket No. 50-298, DPR-46

Dear Mr. Collins:

In accordance with 10CFR50.54(a) issued in the January 10, 1983, Federal Register, this is to inform you that the Cooper Nuclear Station Quality Assurance Program has been incorporated into the Updated Final Safety Analysis Report (USAR) as Appendix D and submitted January 19, 1983. This latest revision of the QA Program is marked as Revision 0 to be consistent with other portions of the USAR.

Attached is a list of the changes made and submitted as Appendix D to the USAR. The changes are minor in nature and primarily reflect reorganization of operating staff by the NPPD Board of Directors. Portions of this revision are currently being evaluated by engineering but do not appear to represent a reduction in the present approved QA program scope which was approved by the staff in December, 1979.

Sincerely,

Jay M. Pilant  
Division Manager of Licensing  
and Quality Assurance
