SEP 7 1982

Mr. Charles E. MacDonald, Chief
Transportation Certification Branch
Division of Fuel Cycle and Material Safety, NMSS
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. MacDonald:

SUBJECT: RENEWAL OF CERTIFICATE OF COMPLIANCE NO. 6115

Reference: Letter, MacDonald to Department of Energy, dated July 22, 1982

The referenced letter informed us that the subject Certificate of Compliance was to expire September 30, 1982. We have discussed the renewal with Argonne National Laboratory, the primary user of the Model R1010-0032 shipping container, covered by the subject Certificate of Compliance. They wish to continue to have Nuclear Regulatory Commission certification on the container, and inform us there have been no problems or transportation incidents associated with the use of this container.

Consequently, please renew the subject Certificate of Compliance and continue to list Argonne National Laboratory as a registered user of this container.

Sincerely,

R. M. Moser, Director
Operational and Environmental
Safety Division
