Industrial Hygiene and Safety Officer

Date 2 June 94

James M. Leddy
Plant Manager

Date 6/2/94

RADIOACTIVE MATERIALS

Radioactive materials are used in certain applications at this site. These areas / applications include the "Dust House" and the feed chutes. No entry is allowed into the feed chutes or under the upper part of the Incline Conveyors (in the Dust House) without permission from the Shift Supervisor on Duty and the sources being closed in these areas. Additionally, no work on or around these devices is allowed without the BCESI Site Representative (or an assigned designee) being present.

No other radioactive devices or materials shall be allowed to be brought on site without the permission of the BCESI Radiation Protection Officer or site Safety Officer.
