MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

License Amendment Request Dated June 13, 1994
Standby Gas Treatment and Secondary Containment Technical Specifications

Attached is a request for a change in the Technical Specifications, Appendix A of the Operating License for the Monticello Nuclear Generating Plant. This request is submitted in accordance with the provisions of 10 CFR Part 50, Section 50.90.

This proposed amendment changes section 3.7/4.7, Standby Gas Treatment System, concerning the surveillance requirement to operate the Standby Gas Treatment System monthly as well as revising performance requirements for the Standby Gas Treatment System filters and process stream electric heaters. The proposed amendment revises Standby Gas Treatment System and Secondary Containment limiting conditions for operation specified in section 3.7 to establish consistency. Changes are also proposed for the Secondary Containment capability surveillance requirement specified in section 4.7.

Exhibit A contains a description of the proposed changes, the reasons for requesting the changes, a Safety Evaluation, a Determination of Significant Hazards Consideration, and an Environmental Assessment. Exhibit B contains the current Technical Specification pages marked up with the proposed changes. Exhibit C contains revised Monticello Technical Specification pages.

Please contact Marvin Engen, Sr Licensing Engineer, (612-295-1291) if you require further information related to this request.
