Gentlemen:

This refers to the routine safety inspection conducted by Mr. B. H. Little of this office on July 1 - August 31, 1982, of activities at Enrico Fermi Nuclear Power Station authorized by NRC Construction Permit No. CPPR-87 and to the discussion of our findings with Mr. E. The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in non-compliance with NRC requirements, as described in the enclosed Appendix. With respect to item 1, the inspection showed that action had been taken to correct the identified noncompliance and to prevent recurrence. Consequently, no reply to this item of noncompliance is required and we have no further questions regarding this matter at this time.

Regarding the remaining item, a written response is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosures will be placed in the NRC's Public Document Room.
