UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

June 9, 1994

Docket No. 50-219

LICENSEE: GPU Nuclear Corporation
FACILITY: Oyster Creek Nuclear Generating Station
SUBJECT: SUMMARY OF JUNE 7, 1994, MEETING STATUS OF LICENSING ACTIONS

On Tuesday, June 7, 1994, a meeting was held at Oyster Creek Nuclear Generating Station with GPU Nuclear Corporation (GPUN, the licensee) and the NRC staff to discuss the status of Oyster Creek licensing actions. Enclosure 1 is the list of individuals participating in the discussion.

Enclosure 2 is a marked-up copy of the staff's Project Manager Report (PMR) for Oyster Creek dated June 3, 1994. The markup to update the PMR resulted from the discussion on each item or TAC number in this meeting. The status of each item is given in the last column on the right side of the PMR sheets. The status in that column is the following: "01" means the licensee, "02" means staff reviews, "03" means staff's Project Manager and "04" means complete.

The updating of the PMR for Oyster Creek was done during the discussion on each licensing action in this meeting. The licensing action items are listed by TAC number (second column from the left).

The licensee indicated that they intend to send a letter regarding thier commitment to replace resilient seals on purge and vent valves every 5 years. In lieu of replacement the licensee proposes to do testing to show that the seals are resilient. The PM indicated that the staff will review GPUN's request. The licensee also indicated that they intend to submit amendments regarding grid undervoltage set points, and to increase the number of spent fuel in the spent fuel pool from 2600 to 2645. They indicate that they have the required space and that no structural modifications to the pool will be necessary.
