Springfield, Massachusetts 01105

Dear Mr. Rosenbaum:

SUBJECT: ROUTINE INSPECTION NO. 030-29567/94-001

On May 3, 1994, Penny Nessen and Ronald Bellamy of this office conducted a routine safety inspection at the above address of activities authorized by the above listed NRC license. The inspection was an examination of your licensed activities as they relate to radiation safety and to compliance with the Commission's regulations and the license conditions. The inspection consisted of observations by the inspector, interviews with personnel, and a selective examination of representative records. The findings of the inspection were discussed with you at the conclusion of the inspection.

Within the scope of this inspection, no violations were identified.

With regard to the transfer of the Promethium-147 material, it was noted during the inspection that this material was transferred approximately 2 months after the material was removed from your license. During the inspection you indicated that you did not request removal of this material from your license. However, you are reminded that it is your responsibility to review all license amendments made to your license and, if there are any errors, notify Region I so that corrections can be made.
