MEETING/TRIP REPORT

DOCKET NO: 70-371

APPLICANT: United Nuclear Corporation (UNC)

DATE OF INSPECTION: April 4 - 7, 1983

PLACE OF INSPECTION: UNC Facility, Montville, CT

ATTENDEES: NRC: J. Roth, Region I  
A. L. Soong, NMSS

LICENSEE: D. Luster

PURPOSE: To accompany Mr. J. Roth, Region I on a health-physcis inspection of the UNC Facility.

MEETING SUMMARY: The items inspected by Mr. Roth were: (1) organization, (2) facility changes and modifications, (3) internal reviews and audits, (4) overall review of the operation, (5) nuclear criticality safety, and (6) radiation protection program. The results of the inspection will be reported by Mr. Roth.

During the tour of the facility, Mr. D. Luster, Radiation and Environmental Specialist, explained in detail the mode of each operation and safety controls for the process equipment and facility. A tour of the facility and participation in the inspection gave me a better understanding of the operation at UNC and should be very helpful in my review of UNC's renewal application for License No. SNH-368.
