U.S. Nuclear Regulatory Commission
Region III
D. G. Wiedeman, Chief
Materials Radiation Protection
Section I
799 Roosevelt Road
Glen Ellyn, Illinois 60137

03014023

Dear Mr. Wiedeman:

This letter is in reply to Mr. C. T. Oberg's visit to our facilities on August 23, 25, and 26, 1982, and your subsequent letter and Notice of Violation. The following are our responses in order to abate each of the four violations found.

1. Concerning violation number one: We have requested that our license, No. 12-15908-02, be amended to include seven Texas Nuclear, Model 5190, source holders. A copy of this letter has been attached for your convenience. CWLP intends to take any and all necessary steps needed to obtain the proper licensing for these sources. Compliance date: Immediately after all necessary requirements can be met to obtain license amendment.
2. Concerning violation number two: A record-keeping system has now been devised and all records pertaining to License No. 12-15908-02 and any future amendments will be kept on file and available for you or your designates review. Mr. Ben Dillard has been assigned the responsibility to maintain all records concerning License No. 12-15908-02. Compliance date: August 22, 1982.
3. Concerning violation number three: Leakage test kits have been ordered from Texas Nuclear, Box 9267, Austin, Texas 78766. CWLP personnel will perform the test according to established procedures. Swabs will then be sent to Texas Nuclear for evaluation. All units on site will be tested upon receipt of the test kits and future tests will be performed at required intervals. Compliance date: Not more than five working days after receipt of test kits.

4. Concerning violation number four: Form NRC-3 is imprinted with the notation that any documents (including, but not limited to, a copy of License No. 12-15908-02 and parts 19 and 20) are available for inspection in Mr. Ben Dillard's office.
Compliance date: September 22, 1982.

Please be advised that it is City Water Light & Power's intention to, one, abate the four cited violations without delay, two, to prevent recurrence of these violations and three, to abide by all applicable NRC standards.

Sincerely,

S. David Farris
Supervisor of Safety

SDF/kal
