USNPO REGION 3  
ATLANTA, GEORGIA

Mr. James P. O'Reilly  
Regional Administrator  
U.S. Nuclear Regulatory Commission  
Region II, Suite 2900  
101 Marietta Street, N.W.  
Atlanta, Georgia 30303

SUBJECT: Virgil C. Summer Nuclear Station  
Docket No. 50/395  
Operating License No. NPF-12  
Special Report per  
Technical Specification 6.9.2

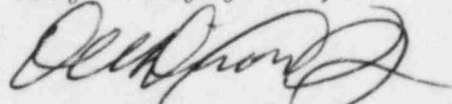

Dear Mr. O'Reilly:

This Special Report is being submitted in accordance with Technical Specification 6.9.2 as a result of entry into the Action Statement of Technical Specification 3.7.10, "Fire Rated Assemblies". On March 17, 1983, Virgil C. Summer Nuclear Station began a plant outage to perform the required D-3 Steam Generator modifications. During this time a number of fire rated assemblies have been or will be made inoperable so as to accomplish various plant modifications associated with this outage. Several of the inoperable fire barriers have been or will be out of service for longer than the seven (7) days specified in Technical Specification 3.7.10, Action Statement "A".

The applicable portions of Technical Specification 3.7.10, Action Statement "A", are being implemented to provide fire watches for areas affected. Within ten (10) days following escalation out of Mode 5, a followup report will be submitted to the Nuclear Regulatory Commission outlining the actions taken during the outage in terms of sealing the affected fire barriers and providing for fire protection while these were out of service.

Should there be any questions, please call us at your convenience.

Very truly yours,

O. W. Dixon, Jr.
