SUMMARY

Scope:

This routine, announced inspection was conducted in the areas of the Physical Security Program for Power Reactors. Specifically in the areas of Management Support, and Security Training and Qualification.

Results:

In the areas inspected, violations or deviations were not identified. The licensee's security program was determined to be effective in providing an acceptable level of protection for the nuclear station's resources and the design basis threat of radiological sabotage. Of noteworthy mention is the safety, proficiency, and innovative approach to weapons qualification and familiarization by the Security Training Department.
