MEMORANDUM FOR: Juanita F. Beeson  
Publications Branch  
Office of Administration

FROM: Ramon E. Hall, Director  
URFO

SUBJECT: DRAFT ENVIRONMENTAL IMPACT STATEMENT FOR THE CROWNPOINT ISL  
PROJECT

As previously arranged between you and Joel Grimm of my staff, the enclosed copy of a preliminary draft Environmental Impact Statement (DEIS) is ready for technical editing. We have strived to conform to all editorial requirements listed in NUREG-0650, "Publishing Documents in the NUREG Series." We request that you make all necessary arrangements to provide your office's editorial services at the earliest convenience.

The DEIS is complete, including the main text and all front and back matter. One exception is Chapter 6, a list of agencies and individuals which will receive the draft upon its publication. This list is still being compiled and will be provided with the preliminary draft submitted subsequently for composition and publication. The chapter will not contain technically oriented information, and we consider it will not require editing. Additionally, Appendix D of the DEIS will provide the public with a list of generalized license conditions, should the project proceed to licensing. Likewise, the proposed license conditions have not been completely compiled. We consider the license conditions are being provided as additional information only, and they will not require editing.

We have also included photocopies of figures for your information. They recently were completed in NRC's graphics department and will be resubmitted soon for additions and corrections. We have requested they be prepared in compliance with all requirements for visual material listed in NUREG-0650. They should require no changes during your review.
