Subject: Oconee Nuclear Station
RO-287/83-04
RO-269/83-05
RO-269/83-10

Dear Sir:

The above Licensee Event Reports were due to be submitted by today. RO-287/83-04 concerns the failure to close a valve on the pressurization line to the Emergency Personnel Air Lock following quarterly performance testing. RO-269/83-05 concerns the failure to meet design criteria on the tie-in of the Standby Shutdown Facility reactor coolant make-up pump to the existing plant. RO-269/83-10 concerns the failure to close the inner door of the Emergency Personnel Air Lock following quarterly performance testing. These events were briefly discussed with you and your Staff on March 23, 1983. These reports are currently in the process of review and final preparation and will be submitted as soon as possible, but in any event, no later than April 19, 1983.

Very truly yours,

Hal B. Tucker
