KING OF PRUSSIA, PENNSYLVANIA 19406

January 29, 1993

MEMORANDUM FOR: Thomas T. Martin, Regional Administrator
Region I

FROM: Barry R. Letts, Director
Office of Investigations Field Office, Region I

SUBJECT: CLOSURE OF CASE NO. 1-92-059: CAMEO DIAGNOSTIC CENTER,
INC./USE OF RADIOACTIVE MATERIALS AT A LOCATION PRIOR TO
RECEIVING NRC APPROVAL VIA THE LICENSE AMENDMENT PROCESS

30-29567

This investigation regarding potential wrongdoing was initiated by the Office of Investigations (OI) on December 16, 1992, under OI Case No. 1-92-059. Coordination has been effected with your technical staff. OI evaluation of the surrounding facts and circumstances indicates that further investigation may be warranted; however, we have been advised that the priority of this matter is low and higher priority cases take precedence. OI is therefore closing this investigation by this memorandum.

Copies of all documents, reports of interview, statements and transcripts obtained by OI during the investigation will be made available at your request. If, at a future date, your staff develops information which raises the priority of the issues involved, please advise my office and we will reevaluate.

cc: J. Weddle, OI:HQ
