U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Docket No. 71-6679  
Half Supertiger Package

Dear Mr. MacDonald:

This letter is in response to our recent telephone conversation with Mr. Dick Odegarden and Mr. Ross Chappell of your office and your conversation with Mr. Jerry Scoville, President, US Ecology, regarding the submittal of additional information required in order to renew/revise the Certificate of Compliance No. 6679. The following items are those addressed in our conversation with your staff:

1. A consolidated application dated November 17, 1980 for renewal of the Certificate of Compliance No. 6679, as referenced in your letter of November 27, 1983, will be revised and submitted within forty five (45) days of the date on this letter. US Ecology's response, dated December 23, 1982, to your 11/27/81 letter, Question 1 apparently addressed these questions adequately but you would like this information consolidated into the application. Therefore, we will be submitting the "Consolidated Application" again within forty five days.
2. In regards to Question 3 (11/27/81), US Ecology will furnish procedures for inspection torquing, handling, etc. along with the consolidated application.
3. US Ecology is not requesting the use of the Half Supertiger in the Mode B application. We are requesting the Certificate of Compliance to be issued for Mode A utilization only.

4. Question 8 of your letter dated 11/27/81 regarding explicit demonstration that the package design meets the requirements of 10CFR71 for the 30-foot drop test was in essence answered by our letter dated 12/23/82. However, further clarification on our response will be included with the Consolidated Application.

If you should have any questions, please do not hesitate in contacting us.

Sincerely,

W. Kenneth Waller  
Chief Radiological Control  
and Safety Officer
