RE: EPRI MOV Performance Prediction Program Topical Report

Dear Mr. Thadani:

We are pleased to provide eleven EPRI MOV Performance Prediction Program reports (Enclosure 1). These reports are provided as supplemental technical information to assist the NRC in reviewing the EPRI MOV Topical Report. The Topical Report will be submitted to the NRC on or about July 31, 1994. These reports are being transmitted under a "Request for Withholding of Documents; 10 CFR 2.790(a)(4)," executed by EPRI with accompanying letter and affidavit (Enclosure 2).

Thank you for scheduling our next meeting for June 28 and 29, 1994. The focus of this meeting will be on review and discussion of the system model, globe, and butterfly valve models. Also on the agenda will be the resolution of any remaining questions the NRC may have on the material provided to date. The topical report content and completion and the NRC review schedule is anticipated to be included in our discussions. The Butterfly Valve Model Description Report will be provided to the NRC in the middle of June 1994.

Note
←

It is our intention to provide the following additional reports on or about July 31, 1994:

- Gate Valve Model Report
- Operator Test Report
- Operator Methodology Report
- Integrated Methodology Report
- Methodology Implementation Guide
- Anchor/Darling Double Disk Valve Methodology Report

- Westinghouse Valve Methodology Report
- In Situ Test Report, Phase 2
- EPRI MOV Performance Prediction Program Topical Report

Based on our anticipated submittal date of the above reports, we propose that a three day meeting with the NRC be held on August 30, 1994, through September 1, 1994, ^{Note} to discuss the remaining reports.

Should your staff or you have any questions regarding the enclosures, please call Clive Callaway, Warren Hall or me.

Sincerely,

for Thomas E. Tipton
