

JUN 8 1994

Docket No. 50-219

GPU Nuclear Corporation
Mr. C. A. Mascari, Vice President and Director
Nuclear Assurance Division
One Upper Pond Road
Parsippany, New Jersey 07054

Dear Mr. Mascari:

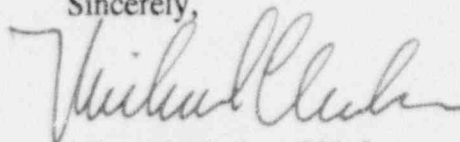

SUBJECT: OPERATIONAL QUALITY ASSURANCE PLAN REVISION FOR THREE
MILE ISLAND, UNIT 1 (50-289), AND OYSTER CREEK GENERATING
STATION (50-219)

Reference: Your letter from Mr. C. A. Mascari to the USNRC, dated April 6, 1994.

We have received your letter transmitting the proposed changes to the Operational Quality Assurance Program for the above generating stations, delegating the QA functions to the Director-Nuclear Safety Assurance. An initial review of your submittal has begun. Although your letter indicates that the changes do not involve reduction in your QA commitments, based on our preliminary review, we believe that a more detailed review by NRR is required to confirm your assertion. We anticipate that this process will require more than 60 days to complete. Upon completion, you will be notified of the results.

If you have any question regarding this review, you may contact Mr. Suresh Chaudhary at (610-337-5335) or Mr. Michael Modes at (610-337-5198).

Sincerely,

Michael Modes, Chief
Materials Section
Division of Reactor Safety
