DUKE POWER

June 13, 1994

U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D.C. 22055

Subject: McGuire Nuclear Station, Units 1 and 2
Docket Nos. 50-369 and 50-370
Supplement to Technical Specification Amendment
Pressurizer and Main Steam Safety Valve Lift Setting Tolerances

Dear Sir:

By letter dated May 05, 1994, Duke Power submitted a supplement to the subject Technical Specification (TS) Amendment request. In that supplement, Duke Power provided the revised TS Surveillance Requirements and TS Bases which corresponded to the revised TS Limiting Condition For Operation's (LCO's) that were provided in the original submittal dated June 26, 1991. In that supplement, Duke Power also stated that the Justification, Safety Analysis and No Significant Hazards Analysis that were included in the original submittal remained valid. Subsequent to that supplement, your staff has requested Duke Power to take the original Justification, Safety Analysis and No Significant Hazards Analysis and mark them up to show the TS Surveillance Requirement and TS Base numbers along with the original TS LCO numbers. Accordingly, please find attached these appropriate marked-up pages.

A copy of this supplement will be provided to the appropriate North Carolina State official.

Should you have any questions, please call P.T. Vu at (704) 875-4302

Very truly yours,

T.C. McMeekin
