The Federal Register Notice should be modified to delete the word "immediate" when referring to the availability of the modem transmission option on page 4 of the final rule. II. SECY-94-131 - ADVANCED MEDICAL SYSTEMS, INC. -- APPEAL OF LBP-90-17 (SUSPENSION ORDER PROCEEDING)

The Commission by a 4-0 vote approved an order denying an appeal by Advanced Medical Systems, Inc. (AMS) from an Atomic Safety and Licensing Board decision (LBP-90-17) which sustained the NRC staff's imposition of an immediately effective suspension order on AMS for alleged violations of its license.

(Subsequently on June 9, 1994 the Secretary signed the order.)

III. SECY-94-144 - INTERVENTION PETITIONS CHALLENGING PROPOSED FUEL SHIPMENTS TO TEMELIN REACTORS IN THE CZECH REPUBLIC

The Commission by a 3-0 vote approved an order responding to three petitions for leave to intervene and for a hearing on the license application filed by Westinghouse Electric Corporation to export nuclear fuel to the Czech Republic for use in the nuclear facility at Temelin.

Commissioners Rogers, Remick, and de Planque approved the order denying the petition because, as petitioners conceded, the petitions were late filed and the Commission did not find a good cause or other justification to warrant overlooking their lateness. Moreover, the Order concluded that the petitioners lacked standing and did not establish any right to a hearing, and that a discretionary hearing would not be in the public interest.

Chairman Selin recused himself from participating in this matter on April 26, 1994.

(Subsequently on June 9, 1994 the Secretary signed the order.)
